Have up-to-date medical information handy for each family member?

Be able to just print out a form from your computer that shows all your current doctors and all your conditions and what medications you are taking?

Feel safer knowing each member of your family has an up-to-date emergency medical card with your family's disaster plan included?

Keep a complete medical history for each family member, including therapies and test results, immunizations, hospitalizations, medications, special care homes, emergency contacts and insurances?

**Connect with your doctor...
Get answers you can trust.**

Manage your personal and family health.

Schedule Appointments

Request Prescription Refills

Ask a Non-urgent Question

**Because the main source of data is the medical record
established by your primary care physician**

You don't have to re-enter all of your information

Private, password protected messaging with several levels of security to protect your confidential information. Safer than regular email because it's authenticated, encrypted and transmitted using secure technology.

Take control of your family's healthcare NOW.

View and manage your own personal health record.

Consolidate charts from several doctors.

EMERGENCY CARE

Regardless of your health, a medical emergency can happen to anyone, any place, any time. Could you remember every doctor you've ever seen, every procedure you've undergone, and every medication you've ever taken? With Health Highway, you can. In fact, you can access it via any Telephone, Internet or a Fax.

Medical Records

If you were unconscious, what could you do if there was no one there to talk for you? With HealthHighway your medical records are just seconds away.

- Life threatening conditions
 - Existing medical problems & Medications
 - Allergies
 - Primary Physician(s)
 - Blood Type
 - Immunizations
- and emergency contacts, legal documents and much more ...

Make better healthcare decisions

HealthHighway gives you access to your complete and accurate health record, enabling you to better understand your health and work more effectively with your doctor to make critical decisions about your care.

Manage chronic conditions

Track your lab results and periodic health metrics (*such as. Blood pressure, blood sugar, and symptoms*)

HealthHighway can give you a clear understanding of your health over time.

Travel with confidence

Now you can hit the road without worrying – **HealthHighway** ensures your complete and accurate health record is available from *anywhere in the world.*

Spend less time filling out forms

Whether you're seeing a specialist, moving out of the area or to another state, or having lab work done, **HealthHighway** gives your doctors access to your complete health record in print, online, or on a USB personal data drive.

Help prevent errors

Medical mistakes kill approximately 100,000 people a year in the United States alone.

(More than car accidents, cancer, and AIDS)

Access to your entire health record, medications, allergies, family history, as well as lifestyle/social details can help your doctors avoid repetitive or unnecessary tests, improve diagnosis accuracy, and prevent incorrect procedures. Your records are as near as a phone, fax or internet.
