

I couldn't believe that a simple internet browser can help me so much, thanks to Health Highway.

Making You Successful

Your problems are ours...

We welcome you to the 21st Century with Health Highway's revolutionary web based, connected, affordable, enterprise software. You've spent many years preparing to be a doctor. With increasing regulatory overhead, the daily challenge is not medicine, rather it's managing the practice and paperwork.

Today's healthcare reform and its bewildering requirements can overwhelm your time, peace of mind and profitability. HEALTH HIGHWAY is the ultimate doctor driven system that automates and manages the practice of medicine. It controls patient medical records, administrative, billing and business functions to keep you profitable, even with Managed Care.

HEALTH HIGHWAY is for anybody trying to cut expenses and decrease the cost of delivery of Medicine. It accommodates the single practitioner, a group practice with multiple specialties and locations, HMO or a regional healthcare information system and a hospital.

Connected Healthcare

A common communication platform for providers, office staff, patients and managed care entities to interact in an efficient and organized manner.

Health Highway, Inc. provides exchanges, a virtual hub and virtual offices, on the Internet for Medical Clinics, Providers, Hospitals, Health Plans, IPAs, and Patients. We provide integrated, enterprise level, Web Services, Application Software, and Information Delivery Systems to the entire healthcare delivery chain.

A million dollar system

for a modest monthly fee...

- **Provider Services:** to make the administrative process efficient and to cost-effectively manage labor intensive tasks and medical records.
- **IPA/Health Plan, Hospital Services:** to provide low-cost exchanges and connectivity to member providers and hospitals.
- **Patient Services:** allowing patients to communicate with the doctor's office including Patient Health Records Portal and tele-medicine.
- **Hospital Services:** integrated hospital services to manage a hospital efficiently. Integrated with all above services.

Pay only for what you need and use. You no longer have to purchase expensive practice management software that includes features that you don't use or want. Instead, you can choose only the features you want and can easily add additional capabilities when you are ready for them.

Internet Based

Your clinical data always at your finger tips. You can have access to your patient information, billing system, scheduling, and clinical records from anywhere in the world.

No Local Network Hassles

Focus on practicing medicine, not maintaining a complicated client-server computer system. We maintain the servers, back up your data on a regular basis, handle security issues and automatically update your software as new features and capabilities become available.

Safe and Secure

We utilize the most current, state-of-the-art Internet standards for securing and storing your information. Strong data encryption, user authentication and tracking assure that our security measures meet or exceed HIPAA standards and specifications. Optional Biometric user authentication (finger print recognition) is available enterprise wide, to assure that only authorized personnel can access or view information.

PROVIDER AND PATIENT SERVICES

The key benefit of Provider Services is to make the administrative process efficient and cost-effective by offering state of the art tools to manage Patient Registration, Billing, Eligibility, Authorizations, Patient Scheduling, Patient e-mail, To Do Lists, Prescriptions, Purchasing/Procurement Tasks and Online Medical Information.

True Resource Scheduling

A full featured patient registration and true resource scheduling with productivity enhancing features such as:

- ◆ Weekly and multiple provider views
- ◆ Authorization tracking by episodes
- ◆ Authorization and eligibility links

Online Billing and A/R Management

Physician billing and accounts receivable management includes such features as :

- ◆ Plan level fee schedules
- ◆ Authorization tracking
- ◆ Online authorization and eligibility
- ◆ Online real-time reporting
- ◆ POS Handheld Device Enabled

Message Center

Online integrated messaging allows you to send, receive and forward email within your office or over the internet. Reduce No-Shows and increase patient satisfaction with:

- ◆ Integrated Appointment Reminders
- ◆ Online To Do list, Calendar and Events
- ◆ Patient Alerts, Letters and Reminders
- ◆ Patient Online Payments

Computerized Patient Record (CPR)

Never lose another patient chart.

If you know how to run a copy machine, you know how to use the CPR document management system. It's that easy to computerize your medical records. Use our EMR Clinical Information system with point and click to write your charts and never fear an audit again.

Easy Chart Entry

Use your voice, handwriting or paper to enter clinical and billing data! No keyboards required, work the way you work today only more efficiently.

- ◆ Dictate on any phone or tablet PC or PDA
- ◆ Write you hand notes on tablet PC
- ◆ Write your notes on paper and scan
- ◆ Mark your superbill, dictate & write progress notes in your own handwriting or in template.

The system will immediately bill, send your prescription, workup orders, follow up and document your notes!

Provider and Clinic Websites

Your own provider and/or clinic website is included with each subscription. Your site can include:

- ◆ Directions to your office
- ◆ Financial policies
- ◆ Physician biographies
- ◆ Accepted insurance plans
- ◆ Frequently asked questions
- ◆ Schedule appointments
- ◆ Online Patient Registration
- ◆ Online Prescription Refill Requests

Hospital, Labs and Pharmacy

Hospital System is an enterprise web based cutting edge technology complete system for running the hospital from Patient Registration, Scheduling of Resources, CPOE, Billing, A/R, Ledger, Financial Management, Reporting, Inventory Control, Human Resources, Nurses Desk, Bed Management, PACS, Radiology, Imaging, Document Management System, Lab, Pharmacy and connecting with serving physicians practices. The system is cost effective, easy to configure and can run on any platform.

Disease Management Tools

Secure online tables can be made available to allow patient entry of medical data such as blood pressure, blood sugar, weight, cholesterol levels, symptoms etc. Once entered, this information can be made available in a graphic representation to provide clear history of an illness and/or a patient's response to treatment. This innovative record keeping and charting feature serves as

a collaborative tool for patient/provider/specialist consulting and disease management thus greatly enhancing patient satisfaction, provider productivity, quality and access to care.

e-Commerce Services

Convert your website into a revenue generator with our comprehensive MediPOS device package. The Package includes support for Point of Sale (POS) devices for:

- ◆ Credit & Debit Card Processing
- ◆ e-Commerce Shopping Cart
- ◆ Online Patient Bill Payment
- ◆ Patient Payment Plan(s)
- ◆ Telephone Check Acceptance
- ◆ NSF Check Collection

You can choose to implement all of the services listed as a single e-commerce package or pick only those services that would most benefit your practice.

Our system works, the way you work !

Enter your protocols once and once only! From the doctor's chart notes, the system administers orders, keeps an electronic chart, alerts you in advance about allergies & drug interactions, does the billing & the rest automatically. It scans & distributes documents. Never fear an audit again!

HEALTH HIGHWAY gives you instant access anywhere in the world to both the clinical and business aspects of your practice. It links you to hospitals and labs for instant results. You can also use an optical scanner to input any data into the patient record. No more hunting for lab results or X-Ray reports!

Workflow automation at its best !

HEALTH HIGHWAY gives you instant access anywhere in the world to both the clinical and business aspects of your practice. It links you to hospitals and labs for instant results. You can also use an optical scanner to input any data into the patient record. No more hunting for lab results or X-Ray reports!

HEALTH HIGHWAY easily links to Payers, Insurances, Pharmacy, Laboratory, Clearing house, Merchant Billings, Data Banks, Global Networks, Financial Markets and Consumer Services

PROVIDER AND PATIENT PRODUCTS

Practice Management System

Our software automates on a real time basis, the work flow of Health Care Providers, Patients and Payers which includes Clinic Management, Scheduling, Health Records, Patients Portals, Billing/Collections, Revenue Cycle Management, Claims Processing, Eligibility, Authorizations, Electronic Remittance Advice and e-Commerce

True Resource based Scheduling

Electronic Medical Records

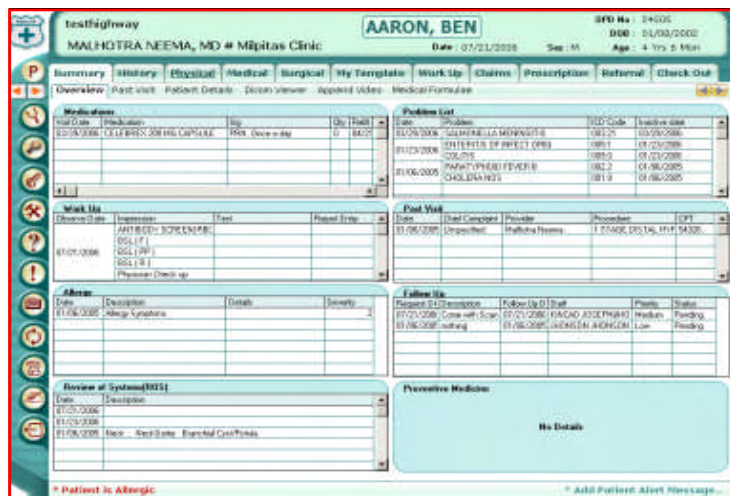

HealthHighway's realtime, integrated Electronic Medical Records increases the efficiency in a busy medical practice. Our software is easy to use, has point and click interface and requires minimal typing. Our software increases revenue by streamlining workflow, decreasing documentation time, reducing cost and decreasing malpractice exposure. Patients records are with Physician available anywhere, all the time.

Key Features

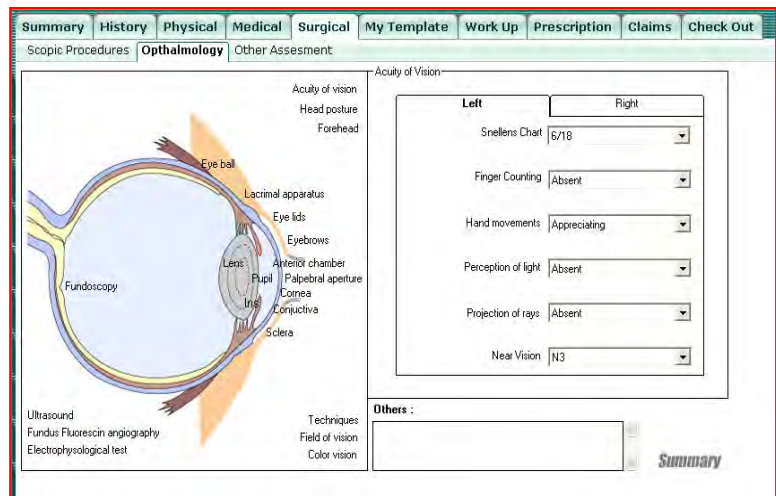

- Point and Click easy to use interface
- Electronic documents/charts storage and Rx.
- Enhanced diagrams, images and DICOM Viewer
- Built-in ICD/CPT codes, labs and medications
- Comprehensive templates based on specialties
- Easily and quickly customizable workflow
- Drug Interactions, Label warnings
- Speech recognition option available
- Fully connected to all other modules

Point and Click templates to easily create summary

Health Highway, connected healthcare solutions

Health Highway is a five year old Silicon Valley based company. Our applications are competitively priced and affordable to fit the budget of a solo practitioner or a large group practice. Our applications are currently being used by over 50,000 providers across the US. Health Highway's innovation, support and state-of-the-art technology make it the obvious choice. It is the Healthcare Management System for today and tomorrow.

What our critics say...

"Excellent System...highly reliable... significant time saving for the physician. Once the SOAP Note is done, the system does the rest including billing"

"Light years ahead of everybody else ! The most significant advance in office automation I've seen...Unbelievable"

"With today's health care reform and HIPPA, Health Highway is a must!"

What our customers say...

" Finally, I can store my documents electronically I never thought I'd see the day. I love it! Free at last from paper work!"

" No more keyboard stumbling, no more mind-numbering manuals written by computer nerds, no more filling out those awful insurance forms, no more hassles. Now I can just see my patients, give orders to my faithful PC, and the job gets done perfectly. I can even work from home"

"I feel in control. I can see graphical reports on our clinic performance revenues receivables, productivity anytime but records, patient ensures, visits"

" Great support, I am not computer literate. They trained me as if I was in grade school. Recommend them highly"

"Office work is easy & fun now. Now I can work on Internet just like my daughter does her school home work"

"I can view patients, prescribe medicines even in the night and this has improved our efficiency a lot"

"I can find my charts, documents in just a second. I do not have to fear audit again"

"No bounced checks anymore. Thanks to Health Highway online eligibility and payment processing system."
